PROFESSIONAL SUMMARY

ISTQB-CTFL Certified QA Engineer with 4.5+ years of experience in **Manual & Automation Testing (Tricentis Tosca, qTest, Cypress, Selenium, Postman)** in **Agile/Scrum**. Proficient in **test planning, test designing, test execution, defect tracking**, and **cross-functional** collaboration. Hands-on with **Tosca, qTest, Java, Python, TestNG, Maven, Jenkins**. Strong knowledge of **SDLC, STLC, CI/CD**. Improved defect detection.

CORE COMPETENCIES

- Testing Tools: Tricentis Tosca, qTest, Selenium WebDriver, Cypress, Postman, Ready API, Appium Inspector, Appium Server, Playwright
- Frameworks: TestNG, Cucumber, Mocha, Chai
- AI in Testing: AI-assisted Test Case Design, Prompt Engineering, LLM-based Test Automation
- Languages: Core Java, Python, JavaScript
- Version Control / CI-CD: Jenkins, Git, GitHub, GitLab
- Database: MySQL, SQL Query Browser
- Testing Types: Functional, Regression, Smoke, Sanity, System, API Testing, Mobile Testing
- Development Tools: Eclipse, IntelliJ IDEA, PyCharm, Visual Studio Code

PROFESSIONAL EXPERIENCE

Application Engineer – Quadrafort Technologies (May 2026 - Present)

Client: Indraprastha Gas Limited (IGL)

Project-1: Salesforce CRM Digital Transformation Project

Description: Migrated legacy CRM systems to **Salesforce**, modernizing customer relationship management with cloud-based solutions. Enhanced customer engagement, streamlined sales/service workflows, and enabled data-driven insights to support business growth.

Responsibilities:

- Performed Functional, Integration, Regression, Smoke, and UAT testing for **Salesforce**-based CRM applications.

- Validated end-to-end customer onboarding journeys for Domestic, Commercial, and Industrial PNG customers.
- Tested omnichannel communication workflows including Email, SMS, WhatsApp, Customer Portal, and Mobile App interactions.
- Tested **Salesforce Field Service** functionalities such as Work Order Management, Technician Scheduling, Inventory Tracking, and Mobile Workforce applications.
- Participated in defect triaging, root cause analysis, requirement reviews, sprint planning, and release validation.

Environment: Salesforce, Appium Server, Appium Inspector

Client: Fujifilm India Pvt. Ltd.

Project-2: Fujifilm Skill Club

Description: Developed a digital resource platform for healthcare professionals, offering training modules on latest medical techniques and technologies. Provided access to industry insights and best practices to strengthen expertise and foster professional growth.

Responsibilities:

- Designed and executed automated test scripts using **Selenium WebDriver** for web modules and **Appium Server/Inspector** for mobile applications, ensuring cross-platform compatibility.
- Developed and maintained robust automation frameworks in **Eclipse IDE**, enabling scalable test execution and reducing manual effort.
- Performed functional, regression, and integration testing to validate training modules, industry insights, and healthcare resource features.
- Collaborated with developers and business analysts to identify requirements, clarify workflows, and ensure alignment with healthcare compliance standards.
- Created detailed defect reports and test documentation to support quality assurance processes and improve traceability.
- Optimized test cases for reusability and maintainability, improving execution speed and reducing redundancy.
- Validated UI/UX consistency and responsiveness across multiple devices and browsers to ensure seamless user experience for healthcare providers and administrators.
- Engaged in Agile ceremonies (daily standups, sprint planning, retrospectives) to contribute to iterative development and continuous improvement.

Environment: Selenium, Appium Server, Appium Inspector, Eclipse

Senior Quality Analyst – Ascendion Inc. (Jan 2026 – April 2026)

Client: SunLife Global Solutions

Project-1: Digital Toolkit Program – Sun Life Financial Distribution

Description: Enterprise platform enabling role-based provisioning of devices, applications, and add-ons to support business operations across users.

Responsibilities:

- Developed and maintained automated provisioning workflows using **Tosca Commander** to accelerate the delivery of digital resources and role-based hardware/software for Sun Life employees.
- Refined the **ServiceNow** request lifecycle and approval gates to ensure seamless, compliant fulfilment of employee requests for digital assets and add-ons.
- Engineered reusable automation modules for dynamic UI validation, ensuring a consistent and high-quality user experience across the Digital Toolkit's web interfaces.
- Orchestrated complex business rule validations within the provisioning engine to maintain strict security compliance and accurate resource allocation.
- Managed comprehensive reporting and end-to-end traceability via **qTest** providing stakeholders with visibility into deployment health and operational efficiency.

Environment: Tricentis Tosca, qTest, Service Now, Ready API

Software Test Engineer – Biz Secure Labs Pvt. Ltd., Pune (Aug 2021 – July 2025)

Project-1: End Point Management

Description: A cross-platform client-server application for managing software deployment, system configurations, policy enforcement, and centralized dashboards for device monitoring.

Responsibilities:

- Designed and executed functional, regression, and smoke tests for desktop and web-based modules.
- Automated test cases using Selenium WebDriver with Java and Maven.
- Integrated automated test suites into Jenkins CI/CD pipeline for continuous testing and timely feedback on builds.
- Configured Jenkins jobs to trigger test executions on code commits and monitored test results for failures.
- Created and maintained test scenarios, test data, and test cases based on user stories.
- Participated in daily stand-ups, sprint planning, and retrospectives as part of the scrum team.
- Reported bugs using JIRA and documented testing activities in Confluence.
- Reduced bug reporting turnaround through optimized defect leakage practices.

Environment: Selenium, Maven, TestNG, Java, Jenkins, Postman, MySQL

Project-2: IT Desk Ticketing System

Description: A web-based support system for managing IT service requests and tracking issue resolution lifecycle.

Responsibilities:

- Automated ticketing workflows, SLA validations, and email notifications using Cypress.
- Performed cross-browser testing (Chrome, Firefox, Edge) using Cypress.
- Validated API requests/responses using Cypress intercepts and assertions.
- Configured Cypress tests in CI/CD pipelines for automated build verification.
- Collaborated with developers and QA team to ensure faster bug resolution.
- Verified backend data consistency with Cypress + SQL validations

Environment: Cypress, Mocha, Chai, Jenkins, Postman, MySQL

CERTIFICATIONS

- ISTQB Certified Tester - Foundation Level (CTFL)
- Generative AI Foundation Certification - up Grad
- Tricentis Tosca – Automating web application testing (AS1, AS2, AE1)
- Selenium WebDriver with Java (Basic to Architect) – Udemy
- Rest API Testing (Automation) – Udemy
- Cypress Automation – Infosys Springboard
- SDET Certification – SEED Infotech, Pune

EDUCATION

- Bachelor of Engineering (B.E.) – Computer Science & Engineering, RGTU, Bhopal
- Senior Secondary (12th) – Om Vidya Mandir H.S. School, Bhopal – State Board
- Secondary (10th) – Om Vidya Mandir H.S. School, Bhopal – State Board
